

MaxPro
Pest Control

Home & Cabin Program

You Can Live Pest Free!

MaxPro Pest Control is a local pest control service that is here to serve you. We take pride in our company and will allow you to put your trust in us. Our integrity is shown through the service we provide to you.

What Kind of Service Should You Expect?

You can expect for your MaxPro technician to be honest, on-time, and equipped with the tools and knowledge needed to get the job done right the first time.

Pesticides?

Yes, we use them but only when and where needed to solve a problem. Our priority is to keep them out in the first place.

Our technician will demonstrate respect for your home/cabin, the things in it, and those who live there. You will be provided with a service report each time the technician is to your home or cabin. The technician will communicate with you regarding what they are doing to manage the pests in or around your home/cabin.

Scheduled vs One-Time Service

Don't expect a hard sales pitch for a long-term contract from us. Sometimes we're needed for a single pest on a single day and other times we're asked to prevent pests year round.

Everyone has a different threshold for pests in their home. That's why we're happy to service you year-round so you'll live completely pest-free, or come out only when you call.

Call us to discuss options for your home or cabin.
